EDUCATION

Zhejiang University

B.Eng. in Control Science and Engineering

- Courses: Automation Control, OOP, Robotic Design, Computer Vision

Hangzhou, China

Sep. 2015 – Jun. 2019

Zhejiang University

Ph.D. in Control Science and Engineering

- Research Interests: Object Re-Identification, Dataset Distillation, Unsupervised Domain Adaptation
- Supervised by Prof. Wei Jiang

Hangzhou, China

Sep. 2019 – Exp. Jun. 2024

National University of Singapore

Visiting Scholar in School of Computing

- Supervised by Prof. Yang You

Singapore

Sep. 2022 – Exp. Oct. 2023

PROJECTS

Dataset Distillation Schemes

Aug. 2022 –

- Reduce storage and computational data burden by synthesizing small surrogate datasets.
- Improve the training efficiency of gradient matching by selecting proper matching targets.
- Propose to distill the datasets into generative models for better diversity and generalization.

Continual Unsupervised Domain Adaptive Re-ID (In submission)

Mar. 2023 – Jul. 2023

- Reduce the catastrophic forgetting in the continual Re-ID scenarios.
- Incorporate a prompter model to recover the color distribution of previous tasks.
- Improve the adaptation performance, anti-forgetting effects and generalization without storing data.

Neural Architecture Search for Object Re-ID

Nov. 2021 – Mar. 2022

- Design a training-validation decoupled searching scheme for Re-ID tasks.
- Search for rational interactions between multi-scale features which are essential for Re-ID.
- Propose a light-weighted network with higher train-from-scratch performance than pre-trained ResNet-50.

Unsupervised Domain Adaptive Re-ID

May. 2020 – Mar. 2021

- Integrate information from multiple views to promote the quality at separate clustering steps.
- Maintain the historical consistency between adjacent clustering results.
- First place solution to the Visual Domain Adaptation Challenge 2020.
- Focus on solving the inter-domain and intra-domain biases for UDA Re-ID.

Angular Triplet Loss for Vehicle Re-ID

Jul. 2019 – Oct. 2019

- Uniform the metric space for triplet loss and cross entropy loss.
- Design an effective baseline with only global feature employed.

WORK EXPERIENCE

OPPO Research Intern

Nov. 2021 – Jun. 2022

- Focused on the generalizable person re-identification structure.

Alibaba Research Intern

Jun. 2020 – Apr. 2021

- Focused on the unsupervised domain adaptive person re-identification.

Yitu Tech. CI Intern

May. 2018 – Aug. 2018

- Participated in building up the automated test pipeline for products.

ACADEMIC SERVICE

Conference Reviewer

- CVPR, ICCV, ECCV

AWARDS & HONORS

- Third Place, ActivityNet Temporal Action Localization Challenge in CVPR Workshop 2022
- Third Place, SoccerNet Challenge 2022 Action Spotting in CVPR Workshop 2022
- First Place, AICity Challenge 2021 Track 2 in CVPR Workshop 2021
- Alibaba Annual Outstanding Research Intern 2020
- Second Prize, National AI Challenge 2020 Person Re-Identification Track 2020
- First Place, Visual Domain Adaptation Challenge 2020 in ECCV Workshop 2020
- Annual Merit Graduate Student 2020
- First Place, Robocup Montreal 2018
